KLASZTER

International Conference On Emergency Management Technology

ICEMT 2011

**Development of European Union public administrative procedures for the reduction and management of environmental hazards**

Recovery of the red sludge disaster as experienced by the Hungarian public administration, civil protection, science, media and economy

May 23-25, 2011

Budapest, Veszprem - Szekszard

**Name:** Ulrike Schauer

**Organisation:** Lower Austrian Regional Government, department for environmental health

**Country:** Austria

**Opinion on the conference:**

There was a very dense program with many interesting and practical as well as sophisticated presentations.

The organisation and the response of the organisation team to wishes and answers was perfect, all people were very nice and polite.

The translators spoke very clear.

It was very important and impressive that we could visit the site, where the catastrophe took place, and also that also the medical aspects – though very short – were presented.

Thank you once again for this conference and the very nice atmosphere!
